DETAILED ACTION

Inventorship

This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).

Priority

Acknowledgment is made of applicant's claim for foreign priority under 35 U.S.C. 119(a)-(d). The certified copy has been filed in parent Application No. 09/15131, filed on 11 September 1998.

Reissue

Applicant is reminded of the continuing obligation under 37 CFR 1.178(b), to timely apprise the Office of any prior or concurrent proceeding in which Patent No. 6,099,402 is or was involved. These proceedings would include interferences, reissues, reexaminations, and litigation.

Applicant is further reminded of the continuing obligation under 37 CFR 1.56, to timely apprise the Office of any information which is material to patentability of the claims under consideration in this reissue application.

These obligations rest with each individual associated with the filing and prosecution of this application for reissue. See also MPEP §§ 1404, 1442.01 and 1442.04.

Applicant is notified that any subsequent amendment to the specification and/or claims must comply with 37 CFR 1.173(b).

Drawings

Figure 9 of the drawings is objected to as failing to comply with 37 CFR 1.84(p)(5) because reference character "60" fails to appear in the disclosure. It appears that the Applicant intended for the item to be labeled as "110" (cf. specification at column 6, line 35).

A proposed drawing correction or corrected drawings are required in reply to the Office action to avoid abandonment of the application. The objection to the drawings will not be held in abeyance.

The Patent and Trademark Office no longer makes drawing changes. See 1017 O.G. 4. It is applicant's responsibility to ensure that the drawings are corrected. Corrections must be made in accordance with the instructions below.

INFORMATION ON HOW TO EFFECT DRAWING CHANGES

1. Correction of Informalities -- 37 CFR 1.85

New corrected drawings must be filed with the changes incorporated therein. Identifying indicia, if provided, should include the title of the invention, inventor's name, and application number, or docket number (if any) if an application number has not been assigned to the application. If this information is provided, it must be placed on the front of each sheet and centered within the top margin. If corrected drawings are required in a Notice of Allowability (PTOL-37), the new drawings **MUST** be filed within the **THREE MONTH** shortened statutory period set for reply in the "Notice of Allowability." Extensions of time may NOT be obtained under the provisions of 37 CFR 1.136 for filing the corrected drawings after the mailing of a Notice of Allowability. The drawings should be filed as a separate paper with a transmittal letter addressed to the Official Draftsperson.

2. Corrections other than Informalities Noted by Draftsperson on form PTO-948.

All changes to the drawings, other than informalities noted by the Draftsperson, **MUST** be made in the same manner as above except that, normally, a highlighted (preferably red ink) sketch of the changes to be incorporated into the new drawings **MUST** be approved by the examiner before the application will be allowed. No changes will be permitted to be made, other than correction of informalities, unless the examiner has approved the proposed changes.

Timing of Corrections

Applicant is required to submit acceptable corrected drawings within the time period set in the Office action. See 37 CFR 1.185(a). Failure to take corrective action within the set (or extended) period will result in **ABANDONMENT** of the application.

Specification

The disclosure is objected to because of the following informalities:

Column 1, line 63; "the coin each one" does not follow. "coins from each opening"?

Column 3, line 65; "haft" appears to refer to "shaft".

Column 6, line 34; "head part 110" fails to appear in the drawings (cf. Figure 9, see drawing objection above).

Appropriate correction is required.

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claim 1 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. The claim recites the limitation "adjusting means" in line 60. There is insufficient antecedent basis for this limitation in the claim.

Allowable Subject Matter

Claims 3-11 are allowed. Claim 2 is objected to as depending from a rejected claim but would be allowable if rewritten to overcome the rejections under 35 U.S.C. 112, second paragraph, set forth in this Office action and to include all of the limitations of the base claim and any intervening claims.

The following is a statement of reasons for the indication of allowable subject matter:

The reasons for allowance of Patent Application Number 09/151,531 are applicable to Applicant's claims 1-7.

Art Unit: 3653

Regarding Applicant's claims 8-11, the Examiner considered Patent Numbers 5,167,571 by Waller and 2,959,324 by Hendrickson et al to be prior art most closely related to the Applicant's claimed invention.

Regarding Applicant's claims 8-10, the drive motor 10 and shaft 12 of the Waller patent are coaxial to disk 14. However said patent fails to disclose or suggest a planetary gear between said motor 10 and rotating disk 14. Similarly, the Hendrickson patent discloses a geared drive motor 12 that is in rotational communication and coaxial to rotating disk 20 without the use of a planetary gear mechanism.

Regarding Applicant's claim 11, neither of the said prior art disclose or suggest a magnetic means of attaching a cover disc to a disc means.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure:

Patent Number 5,254,032 by Abe because of its motor 16/shaft 17 configuration.
